

MGM’s “Macau Space Dream Project” Concludes with Success *Empowering Young Minds to Discover, Create, and Innovate*

[October 21, 2025, Macau] In alignment with the Macao SAR Government’s policy to cultivate scientific and technological talent, MGM, once again in partnership with the Association for Promotion of Science and Technology of Macau (MAPST) and the Chinese Society of Astronautics (CSA), has successfully concluded the “MGM Youth Popular Science Series: Macau Space Dream Project”. Running since May, the program featured a diverse range of activities, including study tours, aerospace science training, role-playing science games, and artificial intelligence workshops.

The project’s award presentation and closing ceremony was held at the Ballroom of MGM COTAI on October 17, with over 250 students, teachers, and representatives from the scientific community in attendance. The event celebrated the achievements of young people passionate about space exploration and encouraged them to continue exploring the mysteries of the universe.

Following a successful launch last year, the “Macau Space Dream Project” has become the city’s first educational program focused on space science and payload technology, structured around the pillars of “Learning, Practice, and Research.” The inaugural 2024 project, which marked the CSA’s first science education initiative in Macau, was honored as an “Outstanding Event of the 2024 National Science Popularization Day” by the China Association for Science and Technology. Through this initiative, MGM hopes to cultivate local students’ interest in aerospace science, while inspiring Macau’s younger generation to embrace innovation and hands-on learning.

The project features two major components: the “Macau Youth Creative Design Competition of Space Experiment” for Form 2 to 5 students, and the “Call from Deep Space” Experiential Camp for Primary 5 and 6 students. The organizers will sponsor the winning secondary school teams on a space-themed research tour in Wenchang, Hainan, where they will experience the remarkable achievements of China’s space industry, including witnessing a live water-based rocket launch demonstration. The teams will also represent Macau in the “2025 International Space Science and Scientific Payload Competition” (ISSSP 2025), to be held this November in Hong Kong. Outstanding primary school participants joined an in-depth educational tour to Zhuhai in late September. The itinerary included a visit to Zhuhai Aerospace Land, the largest space science education hub in China authorized by the China Manned Space Agency. In addition, the students toured the AVICLUB education base to learn about aviation, observe domestic aircraft assembly lines, and experience flight simulators.

The “MGM Youth Popular Science” series also includes the Macao Science and Technology Association’s 2025 National Youth Science Camp and its sub-camp in Macau. Participants will have the opportunity to visit MGM’s properties and learn firsthand about the Company’s technological applications, enhancing their scientific literacy.

Kenneth Feng, President and Executive Director of MGM China Holdings Limited, said: “Space exploration represents a vital frontier in the nation’s scientific and technological development. Through the ‘Macau Space Dream Project’, MGM is committed to nurturing Macau’s future talent in science, technology, engineering, and mathematics (STEM), inspiring young people to explore the universe with curiosity and passion. As the project successfully concludes its second year, we will continue to promote innovative and diverse science education initiatives that enhance students’ problem-solving skills, strengthen their scientific foundation, and empower Macau’s youth to take part in and contribute to the nation’s future in aerospace development.”

Chui Sai Peng Jose, President of the MAPST, said: “The strong participation in this year’s program shows that the seeds of space dreams are taking root and beginning to flourish in Macau. Throughout the program, Macau’s young people have demonstrated interdisciplinary thinking and an innovative spirit. This year also marks the first public appearance of the People’s Liberation Army (PLA)’s Aerospace Force at the parade commemorating the 80th Anniversary of the Victory of the Chinese People’s War of Resistance Against Japanese Aggression and the World Anti-Fascist War — an occasion that has stirred a strong sense of national pride among our youth. Standing at a historic juncture of scientific self-reliance and technological advancement, Macau’s young generation benefits from the unique advantages of the ‘One Country, Two Systems’ framework, while also carrying the mission entrusted by the nation’s vision of becoming a strong aerospace power.”

Wang Yiran, Vice Chairman and Secretary-General of the CSA, said: “Aerospace is not only a strategic cornerstone of the nation’s development, but also a shared pursuit for all humankind. I hope that participants of the ‘Macau Space Dream Project’ will take this milestone as a new beginning, integrating what they have learned into their future studies and daily lives, while continuing to nurture their curiosity about the universe and passion for science. I encourage them to become advocates of aerospace knowledge and practitioners of the aerospace spirit, contributing to the advancement of scientific innovation in Macau and to the nation’s aerospace endeavors.”

The “Macau Space Dream Project” is advised by the Economic Affairs Department of the Liaison Office of the Central People’s Government in the Macao SAR, the Education and Youth Development Bureau (DSEDJ) of the Macao SAR Government, and the Economic and Technological Development Bureau (DSEDT) of the Macao SAR Government. The event is supported by the Hong Kong, Macao and Taiwan Exchange Office of the China Association for Science and Technology (CAST); Beijing Institute of Technology; Chinese Educators Association of Macau; Macau Catholic Schools Association; Macau Civil Service

Educational Association; Macao Science Center Limited; and Macau Youth Science Education Association.

Guests attending the award presentation and closing ceremony included representatives from the Central People's Government Liaison Office in the Macao SAR, the Economic and Technological Development Bureau, the Education and Youth Development Bureau, and several local educational and science associations, alongside MGM executives and supporting organization representatives.

About MGM

MGM is an abbreviation for MGM China Holdings Limited (HKEx: 2282) and is a leading developer, owner and operator of gaming and lodging resorts in Greater China. We are the holding company of MGM Grand Paradise, SA which holds one of the six gaming concessions to run casino games in Macau. MGM Grand Paradise, SA owns and operates MGM MACAU, the award-winning premium integrated resort located on the Macau Peninsula and MGM COTAI, a contemporary luxury integrated resort in Cotai.

MGM MACAU is a Forbes Five-Star luxury integrated resort inspired by the arts with every element of the resort infused with creativity and style. MGM MACAU has approximately 600 guest rooms and suites and boasts a number of distinguishing features, including the architecturally stunning European-inspired Grande Praça, housed under a soaring glass ceiling. The POLY MGM MUSEUM spanning almost 2,000 square meters, is constructed in accordance with Chinese national standards for the exhibition of Grade-One cultural relics. MGM MACAU's world class facilities also include conference and event facilities, spa, and seven signature restaurants and bars to fulfill any gastronomic craving. Our property is conveniently located on the Macau Peninsula and is directly connected to the luxury retail shopping complex, One Central.

Designed as the "jewelry box" of Cotai, MGM COTAI offers approximately 1,400 hotel rooms and suites, meeting space, high end spa, retail offerings, food and beverage outlets as well as the first international Mansion at MGM for the ultimate luxury experience. MGM has joined hands with renowned Chinese filmmaker Zhang Yimou to set up the "Macau 2049" residency in MGM Theater. The Spectacle at MGM COTAI becomes the record holder of the largest free-span gridshell glazed roof (self-supporting) on January 19, 2019, making it the first architectural and structural GUINNESS WORLD RECORDS™ title for Macau, China. MGM COTAI is being developed to drive greater product diversification and bring more advanced and innovative forms of entertainment to Macau as it grows as a global tourist destination. MGM COTAI is the only mega complex and hotel in Macau to

gain three-star certification in both Green Building Design and Operation Label, as well as the first hotel in the Greater Bay Area and second in Greater China to receive the certifications.

MGM China is majority owned by MGM Resorts International (NYSE: MGM) one of the world's leading global hospitality companies, operating a portfolio of destination resort brands including Bellagio, ARIA, MGM Grand, Mandalay Bay and Park MGM.
